DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 1, 2007 has been entered.

Election/Restrictions

2. Applicant's election without traverse of Species C in the reply filed on January 18, 2008 is acknowledged.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Crowe (3122142).

Crowe discloses an absorber comprising two absorbent sheets 24, 25 and what can be considered a by-pass channel member 26 of bundled fibers that feed liquid from one sheet 24 down to the other sheet 25 per claim 1 and 14. Refer to figure 6 and

column 7, lines 33-54. With regards to claim 2, see column 5, line 41 disclosing the absorbent sheet as 1/32 inches which equals .79mm.

5. Claims 1, 2, 8-10, 13 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 01/24750 to Lindsay et al.

Lindsay et al disclose an absorber comprising two absorbent layers, where 20 and 38 are the top layer and 36 is the bottom layer, with a by-pass channel member 24 that transfers liquid from one layer to the other per claim 1. Refer to figures 1B, 2A and 2C. This configuration is substantially similar to applicant's figure 8A with 20 and 38 being equivalent to top layer 11, 36 being equivalent to layer 12 and 24 being equivalent to layer 30. With regards to claim 2, see page 37, lines 18-29. With regards to claims 8-10, see page 19, lines 10-21 disclosing the channel member can be a non-woven web and is positioned as recited in the claims as referred to above in matching the elements of the figures thereto. With regards to claim 13, there is a liquid pervious layer 12 and liquid impervious layer 14 as recited.

Response to Arguments

6. Applicant's arguments with respect to claims 1, 2, 8-10, 13 and 14 have been considered but are moot in view of the new ground(s) of rejection.
